Weather and chance of precipitation at 600m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Cloudy	Cloudy	Light rain showers	Heavy rain showers	Thundery showers	Partly cloudy (night)
Precipitation probability					
30%	40%	50%	50%	60%	20%

Forecast for Tuesday 11 Jul 2023

Weather: A rather cloudy start with patchy outbreaks of rain gradually clearing. Conditions will brighten up for a time but soon, showers will spread in from the west during the morning, intensifying whilst becoming widespread and perhaps thundery in the afternoon. Moderate to strong gusts likely across the highest peaks and in and around showers. Showers may merge before easing into the evening. Turning dry later with clear spells.

Chance of cloud-free hill tops above 600m: 30% rising to 80% through the morning

Low cloud and visibility: Areas of low cloud around 400 m at first, giving poor visibilities across high ground. Bases should gradually lift and break to allow some improvement early afternoon, but highest tops may hold onto cloud throughout. Expect rapid deteriorations in cloud base and visibility around showers. Visibilities generally good outside of showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Sudden heavy downpours may cause slippery paths and localised flooding as well as reduced visibilities. Thunderstorms can also cause danger to life so take extra care if hiking.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Tue 11 Jul 2023	0.4mm	9mm	14.2mm

Forecast for Wednesday 12 Jul 2023

Weather: Fine and dry to start, but scattered showers developing from late morning. These once again pose a risk of turning heavy with thunderstorm activity, before dying away in the evening.

Maximum wind: West to South-westerly 20-25mph gusting 30-35mph.

Chance of cloud-free hill tops above 600m: 80-90%.

Low cloud and visibility: Low cloud mainly in the west of the park during the morning with bases 400 m. This soon lifting and breaking to above summits. Generally good visibilities but turning poor in any heavy downpours or thunderstorms.

Temperature: **Valleys:** Plus 11 deg C rising to Plus 19 deg C
At 600m: Plus 09 deg C rising to Plus 13 deg C
Freezing level: Above summits.
